

FRANK CURZIO

How I Identify

10x+

Crypto Opportunities

The crypto bear market of 2022 has been painful, but make no mistake...

The Big Money transition to digital securities, especially cryptocurrencies and other digital assets, will be one of the biggest revolutions of our lifetime.

Many fortunes have already been made... and lost... in this fledgling industry. But blockchain technology is here to stay. And even though [I'm bullish on Bitcoin](#), it goes way beyond Bitcoin...

I recently sat down with Frank Holmes to discuss [what we need for crypto to rally](#).

I've also interviewed countless other corporate insiders, hedge fund managers, politicians, and crypto entrepreneurs on my Wall Street Unplugged podcast. It's given me an invaluable network for uncovering the best investment ideas out there...

The crypto sector has more upside potential than any I've ever seen—I'm talking 10, 20, 30x your money... But only if you avoid the lure of the “next hot coin” and do your due diligence. It's painfully evident with the [collapse of FTX](#), investors must be well informed and cryptocurrencies must be regulated.

With the move towards mainstream usage of cryptocurrencies [[Walmart sets the stage for crypto payments](#)], NFTs becoming commonplace [[Why NFT prices are plunging and what you need to know before buying the dip](#)], and the development of Web 3.0 technologies [[Metaverse CEO busts the myths](#)], we're seeing more regulation and investor protections in what was once a Wild West sector.

By applying Wall Street analytics to the wide-open and often misunderstood world of blockchain and digital assets, the research my team and I provide aims to be a source of clarity and reason... and provide you with a solid fundamental approach for crypto investing.

Investing is in my blood. My father, Frank Curzio Sr., was a portfolio manager and award-winning investment newsletter publisher. He taught me the tools for success at an early age... and over the past 30 years, I've honed my skills working alongside some of the world's elite investors.

Many of the concepts I've learned can be used for digital assets as well as more traditional investments.

There are many considerations that make up my approach to investing, but there are three I use as guiding principles...

No. 1: Nothing is more important than the quality of management. I'd rather bet on an "A" team with a "B" project instead of the other way around.

No. 2: Make sure the business has the ability to generate income. So many tokens out there are based on flimsy concepts without meaningful real-world applications.

No. 3: Buy at the right price. No matter how good the team or business idea, if you're paying four times what you should for an asset, the risk is too great.

If you invest wisely, the biggest gains in this fledgling market are yet to come...

Frank Curzio, [founder and CEO of Curzio Research](#), is one of America's most respected stock experts. His research is regularly featured on media outlets like CNBC's Kudlow Report, The Call, CNN Radio, ABC News, and Fox Business News. His weekly [Wall Street Unplugged podcast](#)—ranked the No. 1 "most listened-to" financial podcast on iTunes—has been downloaded over 12 million times.
